Cat. No. DME100185P

PRODUCT INFORMATION

Clone ID DM185 VEGFR2 **Target**

Synonyms CD309; FLK1; VEGFR; VEGFR2

Host Species Rabbit

PE-conjugated Anti-VEGFR2 antibody(DM185); Rabbit mAb Description

3-4 weeks P35968

IgG type Rabbit IgG Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Delivery

Uniprot ID

Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Liquid PBS with 0.05% Proclin300, 1% BSA

Storage & Shipping Store at 2°C-8°C for 6 months

> Vascular endothelial growth factor (VEGF) is a major growth factor for endothelial cells. This gene encodes one of the two receptors of the VEGF. This receptor; known as kinase insert domain receptor; is a type III receptor to the time of the two receptors of the vegetarian as the major product of the two receptors. kinase. It functions as the main mediator of VEGF-

induced endothelial proliferation; survival;

Background

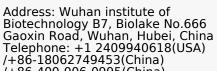

migration; tubular morphogenesis and sprouting. The signalling and trafficking of this receptor are regulated by multiple factors; including Rab GTPase; P2Y purine nucleotide receptor; integrin alphaVbeta3; T-cell protein tyrosine phosphatase; etc.. Mutations of this gene are implicated in infantile capillary hamangiamas.
